

# Wastewater Security: An Operator's Perspective

This DVD-Rom contains valuable information that can help you take practical steps to protect your wastewater treatment facility.

The **DVD** contains a 25-minute video presenting real-life experiences of operators and managers of wastewater systems as they address security issues.

**Additional files** can be accessed by using the DVD with your computer. A variety of helpful tools and resources are available. These include:

- an introduction from Miguel I. Flores, Director, EPA Region 6 Water Quality Protection Division.
- a ninety-seven page booklet: *Protecting Your Community's Assets: A Guide for Small Wastewater Systems*.
- a flow chart for Vulnerability Assessment and Emergency Response Plan development.
- a written transcript of the video.
- a listing of wastewater security web resources.

To access the additional file content using Windows, click My Computer, right click the DVD and select explore, then select the DVD-Rom folder. For Mac users click the DVD icon on the desktop and select DVD-Rom folder.
